”

*Architecture is claimed as
"the search for oneself, but
without forgetting its social
character"*

Manolo Gallego Jorroto
ETSAC Retired Full Professor
National Architectural Prize 1997 and 2018

About us

ETSAC was founded in 1973. Today, the school has around 1,000 students and 100 teachers, 70% of them with PhD. Our academic offer is focused on the degree of Architectural Studies and the degree of Landscape with the University of Santiago de Compostela. Three Master's degrees are also offered: Master in Architectural Refurbishing, Master in Architecture and Master in City Challenges. The school also provides a Doctoral program in Architecture.

The Seminar ...

In line with the consolidation of the Joint Graduate Design (JGD) program between IMUT (Hohoot) and HIT (Harbin) universities, coinciding with the 10th anniversary of the program, a scientific and teaching meeting is proposed involving the six areas of knowledge in architecture teaching at ETSAC.

Throughout the seminar, attendees will have the opportunity to gain a deeper understanding of our teaching and research interests.

Institutions involved:

Higher Technical School of Architecture of A Coruña
ETSAC UDC
(Spain)

Inner Mongolia University of Technology, School of
Architecture IMUTSoA (China)

Harbin Institute of Technology HIT
(China)
